IGP Var Correns, France

TERROIR

The vineyards of Centre-Var, between the famous massifs of Sainte Baume and Bessillons, with a continental climate where the Mistral usually blows, are cultivated with growing methods. Terre Nouvelle is an IGP Var Bio, which expresses the limestone and gypsum soils of its terroir.

WINEMAKING

The grapes are pressed as soon as the night harvest arrives in the cellar, in order to preserve the freshness of the aromas, vinification of the clear juices at moderate temperature, cleaning by racking at the end of alcoholic fermentation to avoid malolactic fermentation which reduces the natural acidity of wines.
